

Raw String Literals

- Raw string literals suppress the interpretation of a string.
- Syntax
 - Are defined by `R"(raw string)"`
 - Support an extended syntax: `R"Sep(raw string)Sep"`
 - `Sep`(maximal 16 characters long, no spaces, backslashes or colons)
- Important helpers for
 - Path expressions: `R"(C:\temp\newFile.txt)"`
 - Regular expressions: `R"(c\+\+)"`
